Educational &  
Developmental  
Psychologist

## Profile

Hi, I'm Cecilia, an Educational and Developmental Psychologist at Conscious Healthcare SA.

I bring over 18 years of experience working in Australia and Hong Kong, specialising in cognitive and behavioural assessments for preschool and school-aged children. I support children by identifying their strengths, learning profiles, neurodiversities, and educational needs. My work includes diagnosing Specific Learning Disorders (such as dyslexia and dysgraphia), giftedness, intellectual disability, attention deficit hyperactivity disorder (ADHD), and collaborating with multidisciplinary teams in the assessment of autism (ASD).

I have worked across government, school-based, and private settings. I am committed to delivering high-quality, evidence-based assessment and intervention. I am particularly passionate about supporting children and adolescents with ASD in their social, emotional, and behavioural development, and in providing practical, individualised recommendations for families and educators. My approach is strength-based and ecological, often informed by teachers/ classroom observations and close collaboration with educators and parents.

I completed my degrees, including Honours and a Master's in Educational Psychology, at the University of Hong Kong. I am registered with AHPRA and am a member of the Australian Psychological Society (APS) and Australian Psychologists and Counsellors in Schools (APACS SA). I also hold professional registrations in Hong Kong Psychological Society (Hong Kong), Health and Care Professions Council (the UK), and Singapore Psychological Society (Singapore). I provide services in English, Cantonese, and Mandarin.

My goal is to help children, families, and educators gain a clear understanding of strengths and support needs of children, and to make positive changes through evidenced-based interventions. I look forward to working alongside you to support positive and lasting outcomes.
